

Research Data Portal FDAT

FDAT (Forschungsdatenarchiv der Universität Tübingen) offers local scientists and research projects various services as well as the necessary technical equipment for the long-term archiving and reuse of their research data. With the FDAT Research Data Portal, the University of Tübingen provides a generic infrastructure for the archiving of research data that meets the requirements of third-party funding providers.

The Consulting Services in Detail

Publishing Articles in Journals with Publications Fees

In the publication context, you will be confronted with terms such as Open Access, Open Choice or DEAL and ORCID, but also terms such as Predatory Journal.

The University Library attracts interest due to its Repository and by offering financial subsidies and signed framework agreements that promise more favourable conditions.

We explain the terms and provide decision-making aids and financial support options.

Impact factors, citation analyses and rankings

For the evaluation of scientific performance, impact factors offer simple possibilities for citation analyses. On the other hand, they often decide about the success of scientists or their working groups. Learn the basics of these rankings.

Scholarly Publishing at the University of Tübingen

30

Scholarly Publishing at the University of Tübingen

The University of Tübingen is committed to ensuring that the research results of its scientists are freely accessible to all. It supports Open Access publishing while respecting the different publication cultures in the different disciplines.

In this leaflet we present our publishing services and would encourage you to contact us with any questions you may have in this regard.

The QR codes will lead you to the relevant information on our homepage. There is also a separate leaflet available for each topic.

The Publication Service in Detail

Tübingen University Press

The publishing house Tübingen University Press (TUP) provides a platform for the excellent research at its university and promotes its visibility and perception.

High quality is the hallmark of all TUP titles. The works are subjected to a peer review process, are edited and proofread, professionally designed and printed in high quality.

Publication as a freely accessible online version is an integral part of the publishing profile. A print version in the TUP publishing layout is possible on request. In this way, TUP makes scientific works available worldwide and at any time.

Tübingen Library Publishing (TLP)

Tübingen Library Publishing (TLP) is the printing service provider for scientific research at the University of Tübingen.

Our editorial team supports authors in the production, publication, printing and distribution of their works. We offer a simple, affordable and individual option to publish monographs such as dissertations, materials, brochures, yearbooks, and other works not only online on the Institutional Repository of the university, but also printed in the cover layout of TLP, with its own ISBN.

Tübingen Open Journals

As a member of the University of Tübingen, you can publish your own Open Access journal. The University Library uses a web-based system to support editors of scientific journals in the publishing and in the managing of the editorial process.

This offer also applies to traditional journals which have previously only been published in paper form.

It enables an entirely electronic publication process in a web browser including everything from article submission, peer reviewing, archiving, through to publication on the web or as a print-on-demand version.

Open Journals

The Institutional Repository of the University of Tübingen

You can electronically publish your article or thesis (when applicable also with the accompanying research data) directly onto the Institutional Repository of the university, previously known as TOBIAS-lib. You may also use the Repository as an author archive to allow reuse of your work, all according to Open Access principles.

Related works such as series or congress reports can be presented under their own overview page in electronic portals.

Central Open Educational Resources Repository (ZOERR)

On the Central Open Educational Resources Repository of the Universities in Baden-Württemberg (ZOERR), open teaching/learning materials are made available. In addition, the platform offers the possibility to adapt and disseminate these resources. OER is any teaching and learning material that is made available with an open licence. The resources in ZOERR are available without restriction.

This service is provided by and is for educators and depends and thrives on high-quality content. If you have your own teaching materials that you can make available to your colleagues or learners, please do not hesitate to contact us.
